Botanical Air Purifier

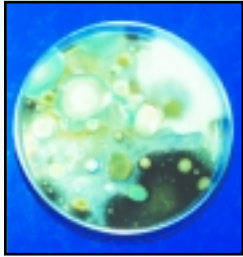

Relief for people with severe allergies

Asthma and Allergy Control For Your Environment

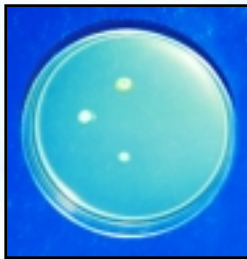

Hygenaie's Air Purifier Cleans Biological & Chemical Pollutants From Indoor Air

Biological Pollutants?

Biological pollutants are or were living organisms. They promote poor indoor air quality that is a major cause of days lost from work or school, and of doctor and hospital visits. Biological pollutants can damage surfaces inside and outside your home. Biological pollutants travel through the air and are invisible to the naked eye.

Culture of odor causing air in typical home or office

Treated air shows significant reduction in air borne contaminants

The most common indoor biological pollutants are molds (fungi). These substances are in every home. Even a spotless home will permit the growth of biological contaminants. It is impossible to get rid of them all, but you can significantly reduce them.

Two conditions are essential to support biological growth: nutrients and moisture. These conditions occur in bathrooms, damp or flooded basements, appliances (washing machines, dryers, humidifiers or air conditioners), carpets and furniture.

Indoor Air and Your Health

Health effects from indoor air pollutants may be experienced soon after exposure or, possibly, years later. Immediate effects may show up after a single exposure

or repeated exposures. These include irritation of the eyes, nose, and throat, headaches, dizziness, and fatigue. Such immediate effects are usually short-term and treatable. Sometimes the treatment is simply identifying and eliminating the person's exposure to the source of the pollution.

When eliminating or avoiding the source of the pollution is impractical, Hygenaie is an inexpensive alternative to costly remediation, remodeling or moving.

Hygenaie's products supply not only relief but will assist in preventing inciting substances from provoking asthma, fungal sinusitis, allergies, hypersensitivity pneumonitis, humidifier fever, and other air-borne maladies by limiting exposure to many indoor air contaminants.

The Natural, Safe Solution To Indoor Air Pollution

Hygenaie's unique botanical formula reduces environmental contaminants, by exchanging its active ingredients with the water vapor in a room's ambient air. Indoor air currents carry the activated solution throughout the room, where it gets to the source of allergens and other contaminants, significantly reducing your exposure to many air contaminants.

Designed for use in the homes and offices the compact, battery-operated, cabinet can be placed anywhere and operates 24/7. The Hygenaie System offers a new inexpensive non-toxic method of air treatment. Hygenaie is safe for humans, animals, plants and furnishings.

Products Designed to Improve Indoor Air Quality

Hygenaie has been providing the finest Indoor Air Quality aids and cleaning solutions on the market since 1994. By using all natural, hypoallergenic ingredients to formulate our proprietary botanical products, we have succeeded in bringing relief to the most sensitive populations. Hygenaie products replace many of the traditional air treatments and cleaning supplies, safely,

without using dangerous ozone or VOCs. All of our products are fragrance free and non-toxic.

The Solution By Hygenaie

Hygenaie's unique protective cleansing and purifying solution deodorizes and freshens while it cleans. The Solution is an all-natural, botanical alternative to harsh and scented cleaning products.

"The Solution" by Hygenaie is a proprietary formula, containing only extracts of vegetable and citrus in its production. Its non-toxic formula replaces many dangerous chemicals and cleaning products in your home.

"The Solution" purifies, cleans and protects. Use it at full strength to remove odors, clean surfaces of equipment, utensils, furniture, floors, carpets, walls

and fixtures. In the kitchen, use "The Solution" as a vegetable wash (spray on veggies and rinse). Spray on cutting boards or any surface to purify and clean. Spray and wipe to put a shine on stainless steel, tile or vinyl. In the laundry room, "The Solution" takes the place of fabric softeners. A few sprays in the dryer will purify and soften clothes.

Many sensitive individuals negatively affected by chemicals and fragrances take "The Solution" with them when traveling. Spray on furnishings and carpets in motel or hotel rooms to remove residual fragrances and pesticides. Spray it in air conditioning or heating units to purify the air they expel.

For personal use spray on cuts, abrasions, burns. "The Solution's" antiseptic properties will speed healing and prevent infection. Check with your physician for other personal uses.
